Portfolio : <https://henil-portfolio-alpha-20.vercel.app/>

Full Stack Developer

- Full Stack Developer with 3+ years of experience building scalable and high-performance web applications using React.js, Node.js, and modern web technologies.
- Experienced in developing real-world applications including e-commerce platforms, admin dashboards, and data-driven systems. Strong expertise in both frontend and backend development, with a focus on clean architecture, performance optimization, and responsive design.
- Skilled in end-to-end development — from designing user interfaces to building backend APIs and deploying applications. Passionate about creating efficient, user-centric, and business-oriented solutions.

SKILLS

Frontend: CSS3, Framer Motion, GSAP, HTML5, JavaScript (ES6+) , React. js, Tailwind CSS

Backend: Express.js, Node. js

Database: MongoDB

State Management: Redux Toolkit (RTK)

Tools: Chrome DevTools, Git, GitHub, VS Code

Other: JWT Authentication, Performance Optimization, Responsive Design, REST APIs

WORK EXPERIENCE

Compatible Solution

March 2022 – April 2025

Full Stack Developer

- Developed and maintained multiple full-stack web applications using React.js, Node.js, and MongoDB
- Built reusable and scalable frontend components, improving development efficiency
- Designed and integrated RESTful APIs with optimized data handling
- Implemented authentication systems using JWT for secure user access
- Improved application performance by optimizing API calls and rendering behavior

- Developed responsive UI ensuring smooth experience across devices
- Collaborated with clients and team members to deliver production-ready features
- Worked on real-world projects including e-commerce platforms, CMS dashboards and much more.

Web Developer Intern

- Built web pages using HTML, CSS, and JavaScript
- Gained hands-on experience in React.js and modern frontend development • Assisted in debugging and improving existing applications

PROJECTS

EASYBUY — Ultra-Fast Grocery Delivery Platform

- Built a high-performance e-commerce platform with advanced product filtering and search
- Implemented authentication and authorization using JWT
- Managed application state efficiently using Redux Toolkit
- Designed responsive UI using Tailwind CSS and added smooth animations
- Integrated backend APIs and optimized data flow for better performance
- Handled structured product data and category management

Tech: React.js, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB

STREET MACHINE — Automotive Intelligence Platform

- Developed a data-driven platform with 300+ vehicles for browsing and comparison
- Built dynamic UI and real-time comparison features
- Designed modern UI with animations for enhanced user experience
- Integrated backend APIs for handling large datasets efficiently
- Focused on performance optimization and responsive design

Tech: React.js, Tailwind CSS, GSAP, Node.js, MongoDB

RK INTERIOR SOLUTION — Portfolio & CMS Platform

- Built a full-stack portfolio platform with admin dashboard for content management
- Implemented secure authentication and media uploads using Cloudinary
- Developed category and content management features for real-time updates

- Designed responsive UI tailored for a premium brand experience
- Structured backend for scalable data handling

Tech: React.js, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB

EDUCATION

Bachelor of Engineering (Computer Engineering)

SAL Institute of Technology
